

VACUUM - PVD THIN FILMS - LEAK TESTING - PLASMA

allianceconcept

Alliance Concept is a French company recognized for the manufacturing and the service of vacuum technology systems.

With more than 30 years of experience, Alliance Concept developed technical solutions in the following fields :

Magnetron sputtering

Thermal evaporation

Arc evaporation coatings

Helium leak testing

Plasma treatment

Vacuum conditioning

We offer our customers a dedicated and personalized support during all system lifetime. From the beginning which is the technical request till the customer on-site commissioning and also for service to keep the system at its high performance level.

Typical milestones:

- Proof of concept via our PVD Lab
- Mechanical design
- Electrical study
- Automation study
- Manufacturing and assembly
- Wiring
- Testing and process characterizations
- Packaging and transport
- Commissioning

THE COMPANY AT A GLANCE

Founded in **1991**
in Annecy

48 team members

14
representatives
around the world

864 customers

654
machines installed
worldwide

BUSINESS AREAS

AERONAUTICS
AUTOMOTIVE
