Helium leak testing systems

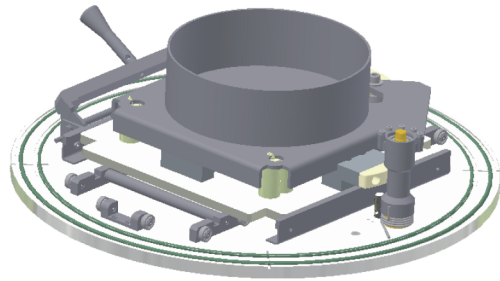

Refrigeration industry

► **We've been designing and manufacturing quality helium leak testing systems for refrigeration and A/C parts for over 20 years**

Excellence in 3D design

Tooling prototyping

► APPLICATIONS

Products

- Rotary and reciprocating compressors
- Scroll compressors
- Condensing units
- Heat pumps

Semi-finished parts

- Copper sub-assemblies
- Compressor upper caps
- Compressor mid-shells
- Industrial heat exchangers
- Safety valves
- Regulating valves

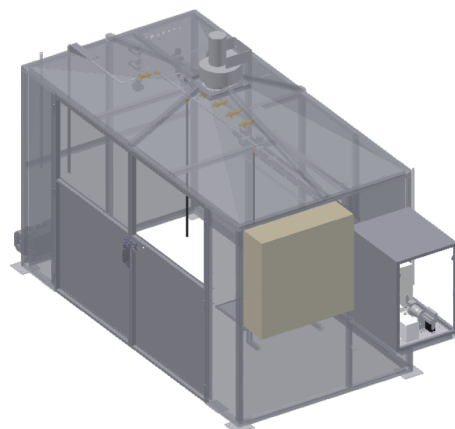

► KEY DATA

- Attractive prices based on over 20 years of experience
- Alternative test methods (hydrogen/Nidron 5)
- Leak rates from 10^{-11} mbar.l/s
- Automated lines, helium sniffing cabins
- High throughput
- Optimised maintenance access
- **Helium recovery and gas mixer**
- **Helium concentration measurement**

► SAMPLE OF OUR KNOW-HOW

Testing of compressor upper caps and mid-shells

Helium sniffing cabine for condensing units
